

This is a beginner course in pattern drafting and has been significantly condensed from our in-house and online courses.

Two weeks isn't enough time to cover everything that is available in the advanced drafting course, but it will give you a good solid foundation on which to build upon your skills by following the online course.

Plan for at least an additional two hours each evening to practice the day's lesson on your own.

Full fees including accommodation and materials is €2330

All tools and equipment provided

Intense one to one training

Day one

Measurements, measurement chart, assessing figure, measuring posture
